Frequently Asked Questions About Fixed Deposits (FDs)

What is a Fixed Deposit?

A fixed deposit is a secure investment where you deposit a lump sum for a set period at a fixed interest rate. Unlike savings accounts, FDs guarantee returns regardless of market changes, making them ideal for conservative investors. Fixed deposits feature capital protection, assured returns, and various tenures, ensuring safety and predictable income.

How is your FD insured under DICGC?

The Deposit Insurance and Credit Guarantee Corporation (DICGC) provides insurance coverage for your fixed deposit investments, offering protection up to 5 lakh per depositor per bank. This government-backed insurance scheme ensures your money remains secure even in unlikely scenarios of bank failure. DICGC coverage includes both principal and accrued interest, subject to the maximum limit.

What is a flexi-fixed deposit (sweep-in/sweep-out facility)?

A flexi-fixed deposit combines the benefits of a fixed deposit with savings account liquidity through automated sweep-in and sweep-out facilities. The sweep-in facility automatically transfers excess funds from your savings account to a fixed deposit when your balance exceeds a predetermined threshold. Conversely, sweep-out transfers money back to your savings account when you need funds, breaking the FD partially without affecting the entire deposit.

What are the eligibility criteria for opening a fixed deposit account?

To open a fixed deposit account, the applicant must be an Indian resident and typically at least 18 years old, although minors can also open an account with a guardian's consent. Valid identity and address proof documents are required, along with a PAN card if the deposit exceeds specified limits. An active bank account is also necessary for transferring funds into the FD.

What documents are required to open a fixed deposit account?

Opening a fixed deposit account requires minimal documentation, especially when applying online through digital platforms like Airtel Finance. The primary documents needed include a PAN card (mandatory for all FD investments), Aadhaar card for identity and address verification, recent passport-sized photographs, and bank account details for

fund transfer. Depending on the case, additional documents may be required, such as income proof for large deposits, alternate address proof if different from Aadhaar, and a senior citizen certificate to avail preferential interest rates.

Is it mandatory to submit a PAN Card for booking an FD with Airtel?

Yes, submitting a PAN Card is mandatory for booking any fixed deposit with Airtel Finance or any other financial institution in India. This requirement stems from income tax regulations and RBI guidelines designed to maintain financial transparency.

Is there a minimum amount required to open a fixed deposit account?

Most fixed deposit schemes come with minimum investment requirements that vary by type. Regular FDs usually require a minimum deposit of 1,000 to 5,000, while senior citizen FDs often have similar or slightly lower minimums. Corporate FDs generally demand higher minimum investments, typically starting from 1 lakh. Special scheme FDs may have different minimum amounts depending on their unique features.

What is the maximum amount I can deposit in a Fixed Deposit?

Fixed deposit investments typically don't have strict maximum limits from banking regulations, though individual banks may set internal caps for risk management. Most financial institutions, including Airtel Finance partners, accommodate substantial deposits while ensuring compliance with regulatory requirements.

Can I invest in multiple FDs simultaneously?

Yes. You can invest in fixed deposit schemes across multiple banks and institutions simultaneously. This investment strategy, known as diversification, offers several advantages for optimising your FD portfolio and maximising returns.

What are the different types of fixed deposit accounts available?

Fixed deposit accounts come in various forms, each designed to meet specific financial needs and preferences. Common FD types include: Regular FD, Tax-Saving FD, Senior Citizen FD, Cumulative FD, Non-Cumulative FD, and Flexi FD.

What is the typical tenure for a fixed deposit?

Fixed deposit tenure options offer flexibility to align with your financial goals. Standard tenures include short-term deposits ranging from 7 days to 1 year, medium-term from 1 to 3 years, and long-term from 3 to 10 years. Some banks also provide special tenures, such as 444 days, to cater to specific investment preferences.

How do interest rates vary between different types of fixed deposits?

Interest rates on fixed deposit investments vary significantly based on deposit type, tenure, and depositor category. Understanding these variations helps optimise returns when you invest in fixed deposit schemes through Airtel Finance or other institutions.

Are there special fixed deposit schemes available for senior citizens?

Yes, senior citizens typically enjoy preferential treatment with fixed deposit schemes. Most partner banks through Airtel Finance offer enhanced interest rates for senior citizens (usually aged 60 and above), with additional rates ranging from 0.25% to 0.50% above standard rates.

What is reinvestment or cumulative FD?

A reinvestment or cumulative fixed deposit is a scheme where the interest earned is automatically reinvested along with the principal amount, allowing your money to grow through compound interest. This type of FD online maximises your returns over the investment period.

Are there fixed deposits available with the option of periodic interest payouts?

Yes, non-cumulative fixed deposit schemes offer periodic interest payouts, providing regular income while keeping your principal amount intact. Available payout frequencies include monthly interest payout, quarterly payouts, half-yearly or annual payouts, and flexible payout options.

Is the interest earned on a fixed deposit compound or simple interest?

The type of interest calculation depends on your chosen fixed deposit scheme. Cumulative FD online schemes typically use compound interest, while non-cumulative FDs with periodic payouts use simple interest calculations.

What is a Sweep-In and Sweep-out facility in FD?

Sweep-in and sweep-out facilities are advanced features of fixed deposits that provide enhanced liquidity and automatic fund management. These facilities bridge the gap between savings accounts and FD online investments, optimising your returns while maintaining accessibility.

What are the tax benefits available under Section 80C for investing in a fixed deposit?

Regular fixed deposit investments do not qualify for tax deductions under Section 80C of the Income Tax Act.

However, specific tax-saving FD online schemes with 5-year lock-in periods are eligible for these benefits.

How secure is my money in a fixed deposit?

Your fixed deposit with Airtel Finance partner banks is backed by strong security measures and statutory protection, making it a highly safe investment option. These measures include DICGC insurance coverage of up to 5 lakhs per depositor per bank, RBI regulation and supervision of all partner banks, strict compliance with banking norms, and regular audits to ensure financial stability and transparency.

Can I take a loan against my Fixed Deposit?

Yes, most banks offer loan facilities against fixed deposits as collateral, providing you with liquidity while keeping your FD investment intact. This facility combines the benefits of fixed deposit with credit accessibility, offering an efficient solution for temporary funding needs.

Can I break my fixed deposit before the maturity date? What are the penalties?

Yes, Airtel Finance fixed deposit allows premature withdrawal after 7 days. However, penalty charges may apply depending on your FDs specific terms and conditions.

What are the interest rates in case of pre-mature FD withdrawal?

Premature withdrawal typically results in reduced FD rates compared to the original agreed-upon rate. Check your FD agreement for exact penalty calculations on early withdrawal.

What happens to a fixed deposit account upon maturity?

Upon maturity, your Airtel Finance fixed deposit principal and interest are credited to your linked bank account unless you choose to renew the FD.

Can I renew my fixed deposit automatically at maturity?

Yes, you can opt to renew FD automatically at maturity. This feature allows seamless reinvestment without manual intervention when your online fixed deposit term ends.

Airtel Postpaid FAQs

Here are some frequently asked questions about Airtel Postpaid plans

What is Airtel Postpaid?

Airtel Postpaid is a feature that leverages 5G slicing technology to deliver enhanced experience to customers

on Postpaid. This feature is specially built for busy customers who depend on uninterrupted connectivity for work,

entertainment, or online collaboration.

Does this mean I get faster speeds all the time?

Airtel Postpaid doesn't mean you'll always get faster speeds; it offers stable and dependable experience

for postpaid customers, even when traffic demand is high.

Will my current speed be impacted if I am not an Airtel Postpaid customer?

No, your current speed will not be impacted because of Airtel Postpaid.

Is Airtel Postpaid available everywhere?

Airtel Postpaid is available in all service areas covered by 5G network, and service quality may depend

upon factors including but not limited to local/indoor coverage, handset limitations, software settings, third-party applications, or device malfunctions.

Airtel Postpaid does not guarantee uninterrupted connectivity, prevent temporary service outages, override force majeure events, or provide the same experience across all locations.

Do I need a new SIM or handset?

No, you do not need a new SIM card to experience Airtel Postpaid. However, the SIM needs to be in a 5G

compatible device with up-to-date software and in a 5G coverage area to experience Airtel Postpaid.

How do I activate Airtel Postpaid?

Airtel Postpaid is auto enabled from backend, no need to do anything to activate Postpaid. It

works if you have a 5G-ready SIM, 5G SA compatible device with the latest software version and you're in an area

with 5G coverage.

Is there any extra charge?

No. This is a default service provided at no extra cost to all postpaid customers.

Can I opt out anytime?

Airtel Postpaid is part of your plan; not an additional service that can be opted out of.

Does this guarantee zero buffering?

Airtel Postpaid is a feature that leverages 5G slicing technology to deliver enhanced experience to customers on Postpaid. This feature is specially built for busy customers who depend on uninterrupted connectivity for work, entertainment, or online collaboration. However, buffering happens due to multiple factors which are beyond the control of service provider including but not limited to, end user device configuration, latency of the web site visited, mobile applications used, etc.

Is this a 5G-only benefit?

Yes, it works on compatible 5G devices, SIM and in areas where 5G coverage is available. Customers can enjoy our service on any 5G SA-enabled smartphone, with their latest software upgrades.

Will all new customers coming to buy postpaid be eligible for Airtel Postpaid?

Yes. Airtel Postpaid is auto enabled for all new postpaid connections including add-on connections.

Is this service in all postpaid plans?

Yes, Postpaid service is part of all plans on offer. Even if an existing user upgrades or downgrades to any available plan, they will get by default.

What is the difference between prepaid and Airtel Postpaid?

The main difference between prepaid and Airtel postpaid is that for the prepaid connection you recharge before the usage of the telecom services and in the Airtel postpaid connection you pay after the usage. In addition,

Airtel Postpaid leverages 5G slicing technology to deliver enhanced experience to customers on postpaid.

Which is the best plan for me?

Airtel Postpaid FAQs

Here are some frequently asked questions about Airtel Postpaid plans

What is Airtel Postpaid?

Airtel Postpaid is a feature that leverages 5G slicing technology to deliver enhanced experience to customers

on Postpaid. This feature is specially built for busy customers who depend on uninterrupted connectivity for work,

entertainment, or online collaboration.

Does this mean I get faster speeds all the time?

Airtel Postpaid doesn't mean you'll always get faster speeds; it offers stable and dependable experience

for postpaid customers, even when traffic demand is high.

Will my current speed be impacted if I am not an Airtel Postpaid customer?

Airtel Postpaid does not guarantee uninterrupted connectivity, prevent temporary service outages, override force majeure events, or provide the same experience across all locations.

Do I need a new SIM or handset?

compatible device with up-to-date software and in a 5G coverage area to experience Airtel Postpaid.

How do I activate Airtel Postpaid?

Airtel Postpaid is auto enabled from backend, no need to do anything to activate Postpaid. It

works if you have a 5G-ready SIM, 5G SA compatible device with the latest software version and you're in an area with 5G coverage.

Is there any extra charge?

Does this guarantee zero buffering?

Airtel Postpaid is a feature that leverages 5G slicing technology to deliver enhanced experience to customers

on Postpaid. This feature is specially built for busy customers who depend on uninterrupted connectivity for work,

entertainment, or online collaboration. However, buffering happens due to multiple factors which are beyond the control

of service provider including but not limited to, end user device configuration, latency of the web site visited, mobile

applications used, etc.

Is this a 5G-only benefit?

Yes, it works on compatible 5G devices, SIM and in areas where 5G coverage is available. Customers can enjoy our

service on any 5G SA-enabled smartphone, with their latest software upgrades.

Will all new customers coming to buy postpaid be eligible for Airtel Postpaid?

Yes. Airtel Postpaid is auto enabled for all new postpaid connections including add-on connections.

Is this service in all postpaid plans?

Yes, Postpaid service is part of all plans on offer. Even if an existing user upgrades or downgrades to

any available plan, they will get by default.

What is the difference between prepaid and Airtel Postpaid?

The main difference between prepaid and Airtel postpaid is that for the prepaid connection you recharge before

the usage of the telecom services and in the Airtel postpaid connection you pay after the usage.

In addition,

Airtel Postpaid leverages 5G slicing technology to deliver enhanced experience to customers on postpaid.

Which is the best plan for me?

How is Personal Loan calculated?

Total Cost of Loan = Principal Amount + (Principal Amount Interest Rate Loan Tenure) + Processing Fees

Prepayment Charges

Where:

Principal Amount

= Total amount borrowed

Interest Rate

= Annual interest rate (as a decimal, e.g., 12.75% = 0.1275)

Loan Tenure

= Duration of the loan in years

Processing Fees

= Any fees charged by the lender (as a flat amount or a percentage of the principal)

Prepayment Charges

= Fees incurred for early repayment (if applicable)

Example:

If you borrow 100,000 at a 12.75% interest rate for 3 years with a processing fee of 2,000 and no prepayment charges:

Total Cost = 100,000 + (100,000 0.1275 3) + 2,000

Total Cost = 100,000 + 38,250 + 2,000

Total Cost = 140,250

This gives you a basic understanding of how to calculate the total cost of a personal loan.

Fees & Charges for Personal Loan

Additionally, prepayment charges may apply if you choose to pay off your loan early, while late payment fees can accrue if you miss a due date. Although interest rates are not classified as fees, they significantly impact the total cost of the loan, and Airtel Finance offers competitive rates worth comparing.

How Does the Credit Score Work?

Your credit score is calculated by authorized credit agencies such as TransUnion CIBIL, Equifax, and Experian. It is based on your credit history, which reflects how you have managed and repaid credit in the past.

If you have a long credit history and consistently made timely payments, you'll likely have a good credit score, making it easier to secure a personal loan with favorable terms.

Conversely, if you've missed payments or been late in repaying, your credit score will be lower. This could result in your loan application being rejected or being offered a loan at higher interest rates.

A credit score is generally the numerical representation of an individual's creditworthiness. It is a three-digit number ranging from 300 to 900 which tells about your credit accounts, total debts, repayment history, and other related information based on credit reports.

How is a credit score calculated?

Credit score is calculated based on the following factors:

Repayment history

Credit Utilisation

Credit history

Credit mix

New Credit enquiries

Why is a credit score important?

A credit score is important as it serves as a financial report card for lenders. This score ranging from 300 to 900 tells them about your credit information and how responsible you are with money. It is important to maintain a good credit score as it affects your ability to get new loans, rent an apartment, or anything where credit is required.

How often should I check my credit score?

It is recommended to check your credit score on a regular basis as it helps you stay informed about your credit health. According to experts, it is good to monitor your credit score every quarter. There are several websites and apps that allow you to check credit scores for free or low cost. You must also check your credit score before applying for a new loan or credit card.

What factors can impact my credit score?

The major factors that can impact your credit score include:

Repayment history avoid late payments, defaults, and missed payments to keep a good credit score

Credit accounts Avoid high utilisation of your credit amount

Credit history Longer credit history with on-time payments is always considered good

Recent credit enquiries or applications Keep your enquiries and applications low

Credit Mix Keep a mix of loans, credit cards, and other such accounts for a good credit score

How can I improve my credit score?

Here's how you can improve your credit score:

Pay your bills consistently on time

Always look forward to keeping your credit card utilisation around 30% of the available limit

Have a diversified credit account with a mix of loans, credit cards, and more

Regularly check your credit report to keep a check on its health

Settle outstanding debts as soon as possible

Keep old accounts active

Use credit only when needed

How long does it take to build a good credit score?

If you wish to build a good credit score, then you need to have patience as it takes time. The specific duration can vary depending on the starting point of your credit and the actions you have been indulged in including repayments.

Usually, it takes several months to a few years to establish a solid credit history and achieve a good credit score. To score 700 or higher, you would need to maintain a great credit history for a period of 2-3 years.

Can I get a loan with a low credit score?

Yes, it is possible to get a loan with a low credit score, but, you must keep in mind that you may not get it on your favourable terms. It can be more challenging and may come with higher interest rates. However, you can also go with secured loans if you are unable to get a loan without providing collateral.

Does checking my own credit score affect it?

Well, checking your own credit score doesn't really affect it as it is often termed as soft enquiry. Your credit score is only affected when a lender or a financial institution checks your credit by getting the report from credit bureaus. This happens only when you apply for a loan or credit card.

How does my credit score affect loan interest rates?

Your credit score affects your

loan interest rates

significantly. If you have a higher credit score, let's say 700 or above, it means you have a good credit history with

great on-time payments. In such cases, lenders and financial institutions are happy to provide you with lower interest rates. However, if you have a credit score below 700, or usually below 650, lenders may consider you a higher credit risk. As a result, they may offer you loans with higher interest rates to compensate for the perceived risk.

Can I have multiple credit scores?

Yes, it is very common to have multiple credit scores as there are many credit bureaus like CIBIL, Equifax, Experian, and CRIF High Mark. All of these bureaus maintain your credit report, on the basis of which they produce your credit score every month. Hence, it is always advisable to check your credit score with these important credit bureaus regularly, though CIBIL score is mainly considered by financial institutions in India.

What is a good credit score range?

A credit score ranges from 300 to 900 and these numbers determine your creditworthiness. Individuals having a credit score in the range of 300-500 are considered to have poor credit. While a score between 501 and 700 is considered a fair credit score, a score between 701 and 750 is considered a good credit score. People with a credit score between 751 and 900 have an excellent credit score.

How do late payments influence my credit score?

Late payments or missed payments have the worst effect on your credit score as your payment history is what defines your credit score. Apart from incurring late fees and penalties, your credit score will also be lowered. However, this usually happens only when the payment is 30 days or more overdue. To minimise the impact of late payments, always strive to pay bills on time, even if its just the minimum amount.

Can I remove negative information from my credit report?

Well, the negative information on your credit report, which is often in the form of late payments and defaults, cannot be removed if it is accurate and reported legitimately by the bureaus. However, there are some steps you can take if you wish to change it:

- Pay off the outstanding amount

- Dispute errors with the credit bureaus and ask them to investigate

- Negotiate with creditors

How do credit utilisation and available credit affect my score?

It is always recommended to keep your credit utilisation below 30% of the available credit. Using the maximum amount from your available credit can negatively impact your score. On the other hand, having a higher total credit limit across all your accounts can be beneficial for your credit score as it will increase your credit capacity and can help keep your credit utilisation rate lower.

Can I build credit without a credit card?

Absolutely, you can build your credit score without a credit card. You can avail yourself of secured loans and credit builder loans to build your credit score. You can also rely on rent and utility payments and credit builder products to establish credit.

Does closing old accounts affect my credit score?

Yes, if you have an old credit account and you wish to close it, then it can potentially affect your credit score. This is because the length of your credit history accounts for about 15% of your overall credit score. So, if your account age is shortened under any circumstance, your credit score will be impacted.

How long do different types of credit information stay on my report?

Different types of credit information can stay on your credit report for varying lengths of time. Here's an insight for you:

- Positive accounts can remain on your credit report as long as they are open and in good position

- Late payments and defaults can stay for up to 7 years

- Closed accounts with no negative history can stay for up to 10 years

- Public records such as civil judgements can stay up to 7 years or more

- Hard enquiries usually stay for a period of up to 2 years

How does bankruptcy affect my credit score?

If you are filing for bankruptcy, then be prepared to witness a significant drop in your credit score as bankruptcy remains on your credit report for an extended period usually up to 10 years. Moreover, after bankruptcy, you may find it challenging to qualify for new credit accounts, and if you do, they often come with higher interest rates and less favourable terms.

Bank OTP Fraud Detection Solution Terms & Conditions

Introduction

To help protect customers from the rapidly increasing threat of Banking one time password (OTP) related scams and

frauds, Bharti Airtel Limited and Bharti Hexacom Limited (together referred to as Airtel) have introduced Bank OTP

Fraud Detection Solution (Fraud Detection Solution).

This service is available to Airtel cellular (prepaid and postpaid) subscribers (Customer) in India.

Identification of OTP-Related Fraud

Airtel uses network intelligence to identify potential OTP fraud when a customer receives an banking OTP while on

an

active incoming cellular call. In such cases, if the call is from a number not saved in the Customer's contacts (as

per

the Airtel App) or if the customer is using a feature phone (non-smartphone), the following actions may be

triggered:

The OTP is temporarily withheld at the network level, and a consent prompt is initiated.

The OTP is released only after the Customer approves the request via the consent prompt.

If the Customer does not approve the request, during or after the call, the OTP is withheld and not delivered.

If the customer does not respond to the consent prompt within 20 seconds, the network will not release the OTP to

the

customers device.

If this occurs twice consecutively on the same day, Airtels Fraud Detection Solution will no longer be applied

from the

third banking OTP onwards, and such OTPs will be delivered without the consent prompt. The system resets at 00:00

hours

(midnight), after which the Bank OTP fraud detection solution will again be applied to banking OTPs.

Where any other banking OTP is received from the carrier partner while the customer has not responded to a pending

consent prompt, such OTP(s) will be placed on hold until a response is received for the first OTP. Upon the customer

responding to the first OTP consent prompt, the same response will be applied to all OTPs that were on hold, as

follows:

if the customer selects NO, all on-hold OTPs will be withheld and not delivered to the customer.

if the customer selects YES, all on-hold OTPs will be treated as approved and will be delivered to

the customer.

if no response is received from the customer within 20 seconds, then all on-hold OTPs will be withheld and not

be
delivered to the customer.

Frictionless OTP Delivery

If the OTP is received while the Customer (using a smartphone) is on an active cellular incoming call with a number

saved in their contact list, the OTP will be delivered instantly (Frictionless OTP), provided that:

The Customer has installed the Airtel App; and

The Customer has provided consent to share their contact list which is governed by the terms and conditions of

the

feature and App and the Airtel Privacy Policy.

Scope, Compliance & Limitations

The OTP Fraud Detection Solution, is currently available only within India.

The OTP Fraud Detection Solution is only triggered when the Customer is on an active incoming cellular (mobile network)

call. It does not apply to calls made over the internet (OTT calling) using apps like WhatsApp, Telegram, etc.

Airtel implements this solution in compliance with applicable Department of Telecommunications (DoT), TRAI, and

other

regulatory or governmental directives, including instructions issued by law enforcement agencies from time to time.

Detection and withholding decisions are based on real-time data and best-effort analysis and may not be exhaustive

or

error-free.

Modification, Suspension & Discontinuation

Airtel reserves the right, at its sole discretion, to modify, suspend, postpone, or discontinue the OTP Fraud

Detection

Solution or any part thereof, across all or part of its service areas, at any time, with or without notice.

Such actions may occur due to reasons including, but not limited to, technical constraints, regulatory requirements, or

circumstances beyond Airtel's reasonable control.

Upon suspension or discontinuation, all related features and services shall cease to apply.

Disclaimer & Liability

The OTP Fraud Detection Solution is provided on an as is and as available basis.

While Airtel endeavors to offer effective fraud prevention measures, it does not warrant or guarantee:

Complete accuracy of fraud detection

Uninterrupted or error-free operation

Fitness for any specific purpose, merchantability, or availability

Identification and withholding of OTP-related fraud are undertaken on a best-effort basis only.

Limitation of Liability

Airtel shall not be liable, whether directly or indirectly, for any losses, damages, claims, or disputes arising

out of

or in connection with the use of the OTP Fraud Detection Solution

If a customer faces issues receiving OTPs on their handset, they can write to us at spam.grievance@airtel.com

. We will

investigate the reason from the backend.

However, an individual who is not registered with Bank can open Account either through banking outlets with Business Correspondent or via Video KYC.

You can avail this feature only if your Account is linked with your Airtel mobile number.

Airtel Safe Pay will only work for You subject to availability of an ideal network availability; server response time to trigger Airtel Safe Pay message on your registered Airtel mobile number.

3) Benefits:

Airtel Safe Pay is the safest way to pay, as based on an internal study done on existing payment processes of major banks thereby providing various benefits to You:

Airtel Safe Pay provides an additional 3rd factor authentication which no other bank/wallet provides. You will receive one more confirmation alert on your phone for the transaction before the amount gets debited from your Account.

Airtel Safe Pay provides additional security feature for Net Banking and UPI payments and hence, is the most secure and safest way to pay by way of adding additional layer of security.

Airtel Safe Pay makes use of superior OTA (Over the Air) technology by Airtel which is a secure network mechanism to deliver message to You. The message gets delivered on your SIM directly irrespective of whether You are on call/idle etc. Without the physical SIM, the confirmation alert does not get delivered and hence prevents major frauds which happen because of cloning. The Account gets debited only when You will accept Airtel Safe Pays confirmation alert within a specific time frame.

Airtel Safe Pay covers both the feature phones and smart phones and hence provides 100% device coverage.

Since Airtel Safe Pay is an additional layer of security, it helps in keeping your money safe in these fraud scenarios which cover majority of payment fraud cases in the country and prevents You from following:

Phishing or vishing frauds: If your Net banking details get compromised or UPI web collect request is initiated from an unidentified source.

Credentials theft: If your data gets stolen during online transaction and could be used further for fraudulent transactions.

Identity cloning: If SMS code gets misused through social engineering, screen share and remote access and could be used further for fraudulent transactions.

Device theft: If your device gets stolen along with credentials and You get your SIM deactivated, fraudulent transactions will not be completed.

4) Process:

Bank will send a message to You to authenticate the transaction on your registered Airtel mobile number before debiting your Account.

The message will flash irrespective of the platform or mode from where You have initiated transaction without any additional SMS cost.

At the time of receiving a transaction for an Account, Banks platform invokes Over The Air (OTA) message to your registered Airtel mobile number of said Account.

You reserve the right to give your approval of Yes/No by accepting/declining it before transaction/payments gets debited from your Account which takes place within a specific time frame.

However, Bank shall not be responsible if You accidentally accept the message before transaction/payment or for any other reason solely attributable to your negligence.

You should not share your credentials or any message during this process with any third party.

5) Non-applicability:

Airtel Safe Pay will not be enabled, if You have only Banks Wallet and no Bank Account.

Airtel Safe Pay will not be enabled, if your account is declared as dormant by Bank as per Reserve

Bank of Indias guidelines.

Airtel Safe Pay will not be enabled, if You dont have Airtel mobile number.

Airtel Safe Pay will not be enabled for Net banking/debit or credit transactions done via any other bank account other than Airtel Payments Bank Account.

Airtel Safe Pay alert will not be sent for transactions done via Bank Virtual Debit card.

Airtel Safe Pay alert will not be sent for transactions done within Airtel App or Airtel website other than UPI and Net banking where Airtel Payments Bank Savings account is getting debited.

6) Other terms and conditions:

Bank reserves its absolute right to withdraw and / or alter any Terms of Airtel Safe Pay, at any time, without assigning any reason or without any prior intimation whatsoever to You.

Bank reserves the right to disqualify You from the benefits of Airtel Safe Pay in case of any fraudulent activity/suspicious transactions.

Bank is only acting as a facilitator to perform the payment transaction and may, in certain scenarios, act as an intermediary and operate as a payment collection agent for the limited purpose of receiving/sending funds on behalf of You. Bank will not be held responsible for any failure or unsuccessful or incomplete transactions initiated by You under any circumstances including for any disputes, chargebacks or reversals arising pursuant to such transaction. You are advised to be caution and careful while populating the payment details.

Bank does not determine, advise or in any manner control the commercial terms of the payment transaction.

Bank may at any time change the terms or withdraw the Product to comply with any guidelines from Reserve Bank of India or any other applicable law.

Airtel Safe Pay alert might get compromised in case of stolen Airtel SIM or stolen device with Airtel SIM linked to your Bank Account or in case of inactive, invalid SIM or cloning of SIM.

Fraud, Misrepresentation and forfeiture would be dealt with in accordance with provisions of Sec 45 of the Insurance Act 1938 as amended from time to time. [A simplified version of the provisions of Section 45 is mentioned below for reference]

Provisions regarding policy not being called into question in terms of Section 45 of the Insurance Act, 1938, as amended from time to time

No Policy of Life Insurance shall be called in question on any ground whatsoever after expiry of 3 yrs from

the date of issuance of policy or

the date of commencement of risk or

the date of revival of policy or

the date of rider to the policy

whichever is later.

On the ground of fraud, a policy of Life Insurance may be called in question within 3 years from

the date of issuance of policy or

the date of commencement of risk or

the date of revival of policy or

the date of rider to the policy

whichever is later.

For this, the insurer should communicate in writing to the insured or legal representative or nominee or assignees of insured, as applicable, mentioning the ground and materials on which such decision is based.

Fraud means any of the following acts committed by insured or by his agent, with the intent to deceive the insurer or to induce the insurer to issue a life insurance policy:

The suggestion, as a fact of that which is not true and which the insured does not believe to be true;

The active concealment of a fact by the insured having knowledge or belief of the fact;

Any other act fitted to deceive; and

Mere silence is not fraud unless, depending on circumstances of the case, it is the duty of the insured or his agent keeping silence to speak or silence is in itself equivalent to speak.

No Insurer shall repudiate a life insurance Policy on the ground of Fraud, if the Insured / beneficiary can prove that the misstatement was true to the best of his knowledge and there was no deliberate intention to suppress the fact or that such mis-statement of or suppression of material fact are within the knowledge of the insurer. Onus of disproving is upon the policyholder, if alive, or beneficiaries.

Life insurance Policy can be called in question within 3 years on the ground that any statement of or suppression of a fact material to expectancy of life of the insured was

incorrectly made in the proposal or other document basis which policy was issued or revived or rider issued. For this, the insurer should communicate in writing to the insured or legal representative or nominee or assignees of insured, as applicable, mentioning the ground and materials on which decision to repudiate the policy of life insurance is based.

In case repudiation is on ground of mis-statement and not on fraud, the premium collected on policy till the date of repudiation shall be paid to the insured or legal representative or nominee or assignees of insured, within a period of 90 days from the date of repudiation.

Fact shall not be considered material unless it has a direct bearing on the risk undertaken by the insurer. The onus is on insurer to show that if the insurer had been aware of the said fact, no life insurance policy would have been issued to the insured.

The insurer can call for proof of age at any time if he is entitled to do so and no policy shall be deemed to be called in question merely because the terms of the policy are adjusted on subsequent proof of age of life insured. So, this Section will not be applicable for questioning age or adjustment based on proof of age submitted subsequently.

[Disclaimer: This is not a comprehensive list of amendments of Insurance Laws (Amendment) Ordinance, 2014 and only a simplified version prepared for general information. Policy Holders are advised to refer to Original Ordinance Gazette Notification dated December 26, 2014 for complete and accurate details.]

Claims Procedure:

Age proof of the insured: Since the policy is issued basis date of birth declared by the insured at the time of opting for the policy, to validate the actual age of the insured, Bharti AXA Life will be calling for age proof of the insured at the claims stage. If the age of the insured is found to be outside the permissible age bracket of 18-55 yrs, such claim would be repudiated.

Nominee details: For cases where nominee details are not available, Bharti AXA Life would need a valid legal document (like succession certificate issued by court) to decide on the legal heirs of the life insured and payee for the claim benefit. Getting such document is a tedious and lengthy process and hence, claim process for such cases would be delayed (till receipt of such document).

Sum assured per SIM would be restricted to INR 2,00,000/- (Indian Rupees Two Lakhs only)

In case the member is holding multiple sim cards and insurance is activated on all such cards, maximum Sum Assured payable at the time of death claim will not exceed INR 2,00,000/- (Indian Rupees Two Lakhs only) in any case.

Below are the documents required to register the claim:

Mandatory documents

Death Claim Form

Copy of Death Certificate issued by Local Authority
